SIR,

Adverting to your letter No.4108-23/Edn.2-14-144 dated 16th April 1915, I have the honour to inform you that one foreign scholarship for the study of the Locomotive branch of Mechanical Engineering is required in connection with the work of the Railway Department. The scholarship should be tenable for a period of 7 years to admit of the holder undergoing training in England at Crewe or Swindon preferably the former as noted below:-

3 years as a premium apprentice passing through nut and bolt, fitting and erecting shops.

2 years as a private pupil of the Chief Mechanical Engineer passing through pattern, Foundry, Millwright, Boiler shops, etc., and also drawing office.

1 year as a Draftsman.

1 year in the Running Department.

It would also be desirable to arrange for 6 selected candidates to work in the State Loco Department for 6 months on probation and award the -

scholarship to the best of them.

To

OFFICE OF THE
DIRECTOR OF INDUSTRIES AND COMMERCE.
"RINGWOOD," HIGH GROUND,

Bangalore, 22nd April 1915

ALFRED CHATTERTON, Esq., F. C. G. I., C. I. E.,
Director of Industries and Commerce in Mysore,
Bangalore. (India).

The Secretary to the Government of His Highness the
Maharaja of Mysore,
Departments of Education & Agriculture.

SIR,

With reference to your No.4108-23/E.I.14-144 dated the 16th April 1915, I have the honour to suggest that if suitable candidates can be found, foreign scholarships should be granted for the study of the following subjects which are likely to become important in the future in connection with the development of this Department:--

(1) Wood Distillation
(2) The Metallurgy of Iron and Steel
(3) Perfumery
(4) Soap Manufacture
(5) Mechanical Engineering
and (6) Button Manufacture.

In each case the scholarships should be of the value of about £.200/- per annum and the length of time for which they should be granted will depend upon the qualification and previous experience of the persons to whom they are granted.

(1) Wood Distillation: I understand that the Development Commission in England have taken up a demonstration area in the forest of Dean and that there they have set up a very modern wood distillation plant and I imagine that on application to the Commission any delegate from the Mysore Government will be received and

and given proper instruction. Of course the terms upon which he can be admitted will have to be ascertained from the Commission, the address of which is

The Secretary,

6.A. Deans Yard,

Westminster, S.W.,

(2) The Metallurgy of Iron and Steel: In view of the possible development of the manufacture of charcoal iron in this State, it may be well to send a man Home for training. It will probably be desirable that he should spend a year or two studying the metallurgy of steel and then at least a year in charcoal iron works either in Sweden or America. With regard to obtaining admission to such iron works, I would suggest that Mr. Perin might be asked if he could arrange for the same.

(3) Perfumery: I think it is possible that the manufacture of essential oils and perfumes will become important in India in the future and it is proposed to take up this work in the Institute of Science and already something in this direction has been done. I am unable to suggest what steps should be taken to ensure placing the man in a position to acquire practical knowledge of the industrial processes connected with the manufacture of perfumes and essential oils; but I should imagine that there would be no great difficulty in finding a firm who, for a consideration, would take in a student from Mysore.

(4) Soap Manufacture: There is hardly any doubt that the manufacture of soap can be successfully started in this State and the prospects for the same are somewhat better as the Cotton Seed Oil Co., which has now proceeded to allotment, will be able to supply good cotton seed oil and cotton seed oil foots. Government are already aware of the difficulty of getting a man into a soap factory in England. It is likely that a soap factory will be started here for the manufacture of common bar soap

and

and it will be desirable that the scholarship holder should acquire a practical knowledge of the manufacture of high class soaps and it will probably be possible to obtain admission into one of the many small factories devoted to these specialities in France.

(5) Mechanical Engineering: It is desirable to send a Mysore student who has passed through the mechanical engineering branch of one of the Engineering Colleges in India to Europe for practical training in mechanical engineering. He should be sent for at least three years and I imagine it will not be difficult to arrange for some firm to take him in on payment either of a premium or possibly the British Government will allow him to enter one of the many large factories which they control. In this case the schclarship need not be of a greater value than £.150/- a year.

(6) Button Manufacture: This is a small industry which may possibly be developed in this State if any one with a thorough practical knowledge of the trade were to start it. The capital required will not be very large in the beginning and it may be worth while to send Home a trained mechanical engineer with a view to acquiring a practical knowledge of the various processes. One of the largest firms engaged in this trade is Messrs. Firman and Sons, Ltd., Globe Works, Birmingham. They have a very large business both with the British and Indian Governments and I think it is not impossible that under certain conditions they will be prepared to train an Indian with a view to opening branch works in India where the cheap labour will be an inducement. Much of the British button trade has already left the country owing to Italian competition and I am nearly certain that they will consider the possibility of cheap Indian labour an inducement to start out here provided the capital for the local works is found in India.

Enclosure No.

SUBJECT.

N O T E

on

Trainin~ of selected ~raduates for hi~her Mechanical Engineering.

The graduate to be selected must have obtained in addition to his B.A., a professional degree from some recognised Engineering College of India, preferably with Mechanical Engineering as optional subject. There would be no good in sending an Arts Graduate to learn elements of Engineering in England. On the other hand, even the selected Engineering Graduate should have at least 2 or 3 years' experience in our own Workshop before he is sent to England. In this case, the requirements of the Department and of the country with its resources will better be realised by the selected candidate and this would be a great advantage in every way.

2. It is therefore very desirable that some of the Sub-Assistant Engineers of the Department should be selected and sent to England with necessary and sufficient encouragement by way of scholarships and improved future prospects after their return to Mysore. With this view, all the officers in the Department were asked to state which of them are willing to proceed to foreign countries for higher training in Mechanical Engineering.

3. Mr.K.Srinivasaiengar, Mr.Ganesh Iyer and Mr.Venkatasubba Rao are the only three men who have volunteered to undergo higher Mechanical training in foreign countries. But of these, Mr.Srinivasa Iyengar says he can only go out after 4 or 5 year

on account of his own domestic considerations, while Mr.Venkatasubba Rao, who has only put in one year's service in the Department, says he would like to gain experience in our Workshop for 3 or 4 years before proceeding to England. Thus there is only one candidate Mr.Ganesha Iyer who may be selected and sent out immediately. Next year, after a fresh recruitment of men, the proposal would again be put forward before all likely men and one or two more names will be suggested.

4. As regards the period of training, it is considered quite essential that the selected candidate should be made to tackle all sorts of works in a general Workshop for at least 4 or 5 years, if it is desirable to get a really efficient training, so that the selected candidate after his return may take the initiative in developing the work entrusted to him.

5. As soon as this proposal is approved, further details will be settled in consultation with Mr.Ganesh Iyer.

OFFICE OF THE CHIEF ELECTRICAL ENGINEER

Bangalore, 22nd April 1915.

(Mysore) No. 152

C.S. Balasundaram Iyer Esq., B.A.,

Secretary to the Govt. of Mysore,

Depts. of Education & Agriculture,

Bangalore.

Sir,

With reference to your letter No.4108-23/Ed.2-14-144 dated the 16th of April 1915, I have the honour to inform you that I am preparing proposals for the training of Officers of and for the Cauvery Power Scheme, which will be submitted to the Secretary to the Govt. of Mysore, P.W.D., sometime during the latter part of next week. These proposals, while not com-plete, include the sending of two of our Officers during the year 1915-16 to the General Electric Company of New York and other manufacturing concerns for practical training and investi-gation work for one year only as the first step.

II. For these two scholarships, I would recommend that Mr.S.L. Sheshadri Iyengar and Mr. A.T. Westrap be sent.

III. Mr. Iyengar would be sent for the purpose of attending the International Congress of Electrical Engineers to be held some time in September 1915 at San Francisco, Caliphornia, in the grounds of the Panama Pacific Exposition. After this Con-gress has closed, he should proceed to Schenectady for the pur-pose of studying and becoming familiar with modern high-tension apparatus and go through certain Departments of their Factories

at Schenectady, Lynn, Pittsfield and other places for, say, approximately 6 months. The remaining of his time to be oc-cupied in visiting the large high-tension power schemes, es-pecially hydro-electric, in various parts of the States, such as the Missouri Power Company on the Mississippi River, the Niagara Falls Power Company, &c. &c. When this part of the schedule is complete , he would then return home.

IV. In the case of Mr.Westrap, he will be sent direct to Schenectady and spends about 9 months of his time in going thro' the Testing Department according to a pre-arranged schedule, and the latter 3 months would be spent in the works of the large water-wheel builders, Messrs.James Leffel & Co., Springfield, Ohio, Messrs. S.Morgan Smith Co., York, and the Pelton Water Wheel Company, New York. After the completion of this work, he will return home.

V. It should be understood that these Officers, should they secure the scholarship and proceed to the United States, their full salary during the absence and their travelling ex-penses be paid them, and any increments that might become due during their absence would be effective.

VI. Mr.S.D. Iyengar is Offg. Chief Operator at Sivasamudram and is a Graduate of the Madras University and has spent nearly 2 years in the General Electric Company's Testing Department at their Schenectady Works and is a Graduate of the University of Columbia in New York City with the degree of M.A.

VII. Mr.Westrap is our Senior Hydraulic Operator in the Ge-nerating Station at Sivasamudram, where he has been employed since the beginning of the work and has gradually risen to his

It is requested that in future communications on the subject, the No and date of this letter, and the distinguishing letters below the number as given opposite may be quoted and addressed to the Comptroller, Mysore Government.

SIR,

Adverting to your letter No. 4108-23/Edn 2-14-144 dated 16th April 1915 calling for my proposals regarding the number and kind of scholarships required for the study of subjects connected with my Department, and the exact subjects for which they should be granted, I have the honour to state that there is already a scholarship awarded for training in actuarial science and another has been sanctioned for Banking in G.O. No. 2444-5/Edn 2-14-119 of the 9th January 1915. I beg, therefore, to propose that for 1915-16 two scholarships may be sanctioned both from State funds, viz., for (1) Accountancy and (2) General and Local Finance, Economics and Statistics. These two scholarships with the other two already sanctioned will, for the present, complete the subjects in which training is required in connection with my department.

My proposals in regard to the training of a Mysore Graduate in Accountancy is already before Government Vide correspondence ending with my letter No. 7541/ R 346 dated the 12th April 1914. Needful particulars for training in General Finance will be obtained and
